

Nick Nowe

Web Programmer / Graphic Designer

Website placeholder

Middle Sackville, NS

nick.nowe@gmail.com

// PERSONAL STATEMENT

After working as a graphic designer/multimedia developer for eight years, which often involved working with programmers, I've decided to branch into web development. My current goal is to focus on web development and programming, while bringing the knowledge and skills of a related perspective to the table.

// EDUCATION

2018-Present, IT Web Development Program

Nova Scotia Community College

Building programming skills and knowledge to create, develop and maintain websites and web applications which support business services and operations.

Topics being covered, or will be covered include:

- Professional Practices
- Data Fundamentals
- Project Management
- Networking and Security
- Operating Systems - Linux
- Windows Administration
- Web Server Fundamentals
- Developing for CMS
- Web Development
- Web Application Programming
- Web Design Fundamentals
- User Interface Design / Development
- Object Oriented Programming
- Logic and Programming
- Client Side Programming
- Full Stack Programming

2007-2009, Graphic Design Program

Nova Scotia Community College

Learning the essential skills required to be a successful Graphic Designer by covering subjects such as design process and management, design history, typography, digital imaging, editorial design, branding, and professional practice.

// WORK EXPERIENCE

2014-2017, Freelance Graphic Designer / Multimedia Developer

Provided graphic design and multimedia support for a variety of clients and projects.

Clients and Projects

- [Various Clients](#) - Logos, posters, stationary, and mockups
- [Mosaic Manufacturing](#) - Flash HTML 5 demonstration animations
- [E-Learning Media Inc.](#) - Articulate Storyline template creation
- [Bluedrop](#) - Articulate Storyline courseware development

- [Supercar System](#) - image editing and compression
- [Veterans Affairs Canada](#) - Articulate Storyline courseware development
- [PulseLearning](#) - startup Articulate Storyline courseware development

Accomplishments

Created e-learning courseware with Veterans Affairs Canada to help veterans across Canada learn about, and get the benefits they deserve.

2009-2014, Atlantis Systems Inc.

Intermediate Graphic Designer / Multimedia Developer

At Atlantis, I worked with a team to create, manage, and delegate media for SCORM compliant, web-based e-learning. Atlantis' courseware is being used by the Canadian military to increase trainee knowledge, skill levels and productivity.

Job Responsibilities

- Create graphics, animations, and interactive components for computer-based training.
- Define processes and standards for development of media content.
- Manage and delegate multimedia tasks.
- Review graphics for quality and standards.
- Provide guidance and insight through mentoring fellow colleagues.

Clients and Projects

- [Sikorsky Aerospace](#) - Maritime Helicopter Project
- [CAE](#) - CC130J Aircrew Phase II Project
- [Lockheed Martin](#) - SEACOT
- [Department of National Defence](#) - various EPSS Projects
- [Allied Wings](#) - CFTS

Accomplishments

Helped to streamline the media development process, as well as, reduced the amount errors caught during QA by defining standards and processes, and through the creation of resource and asset libraries. As a result, the amount of time needed for media creation was heavily reduced during both the initial creation of media and the amount of rework needed.

// TECHNICAL SKILLS

IT Web Development (applications / languages I'm currently learning at NSCC)

Visual Studio Code, VMware Workstation, Visio, Visual Paradigm, DataGrip, Notepad++, Git/Github, Javascript, MySQL, HTML5 and CSS3.

Adobe Creative Suite (Photoshop, Flash, Illustrator, Dreamweaver, and Indesign)

Commonly used for various graphic design and multimedia needs such as, but not limited to, logos, posters, animations, webpages, interface elements, icons, stationary, and layouts.

Articulate Storyline

Used in creating proof of concepts for e-learning, developing e-learning courseware, and preparing templates for other developers.
